

Duslofert® Extra 14 - 10 - 20 + 7S

Composition, properties, appearance:

Chloride-free multicomponent granulated fertilizer Duslofert® Extra contains basic nutrients – nitrogen, phosphorus, potassium and secondary nutrients – sulphur, calcium and magnesium. Nitrogen is in nitrate and ammonium form, phosphorus is in water-soluble form and potassium is in sulphate form. The granulate has a grey, or grey-brown colour and is surface treated.

The chlorides content is less than 1 % by weight.

Technical specification:

total nitrogen content (N)	14 %
nitrate nitrogen content	5.7 %
ammonium nitrogen content	8.3 %
total phosphorus content (P ₂ O ₅)	10 %
total potassium content (K ₂ O)	20 %
total sulphur content (S)	7 %
MgO content	1.2 %
CaO content	2.1 %

grain-size distribution:

content of particles from 2 to 5 mm	min. 90 %
content of particles under 1 mm	max. 1 %
content of particles over 10 mm	0 %

Application:

The fertilizer is used for basic pre-seeding fertilization of chlorine sensitive agricultural plants as vine, tobacco, fruit-trees, hop, the majority of vegetables types, potatoes and decorative plants.

A part of the dose (1/3) can be used for additional fertilization in vegetation time.

Benchmark dosing in kg per ha:

COMMODITY	FERTILIZER DOSE FOR 1 YEAR
vine	400 – 500
fruit-trees	300 – 400
fruit vegetables	250 – 350
leguminous plants	200 – 250
green vegetables	150 – 250
cole crops	300 – 350
potatoes	300 – 400
decorative plants	150 – 200

The recommended doses are informative; it is necessary to respect the soil nutrient supplies, expected yield and possibilities to combine the fertilizer with other fertilizer types.

Package:

The fertilizer is packed into polyethylene bags containing 50 kg of the fertilizer or delivered in bulk. Polyethylene bags with a weight following customer requirements are used for small-lot consumption packages.

Storage:

The fertilizer is stored in original undamaged and closed containers in storerooms according to STN 46 57 50 separately from food-stuffs, drinks, feed-stuffs, pesticides and their containers. Small-lot consumption containers are to be stored separately from pharmaceuticals and disinfectants.
