

NOVOZIR® MN 80

Active substance:

80 % of mancozeb (complex of ethylene-1,2-bis(dithiocarbamate)manganese and zinc salt ions).

Application:

NOVOZIR® MN 80 is a broad-spectrum contact fungicide agent in a form of dispersable powder dedicated for plant protection with a wide-scope usage. Its unflinching effect against more than 50 phytopathogenic fungi at more than 30 plant commodities, different possibilities of application, and low toxicity enables its universal usage in plant production, warehousing and forest resources management. Novozir® MN 80 can be used to protect field-crops, fruit timber species, vegetables, wine grapes, decorative plants, and forest timber species against fungoid illnesses. It represents a reliable protection of plants against downy mildew, foot rot, antracnose, and scab, an illnesses resulting in leaf spot. Providing plants have been treated early enough, this product is effective also against a red fire disease. It reduces presence of mites on fruit timber species. It can be also used for seed and plant staining and for disinfection of storage facilities. Taking a Novozir® MN 80 contact effect into consideration a preventive application of this agent is recommended.

Specification:

QUALITY CHARACTERISTICS	VALUES
mancozeb in %	min. 80.0
ethylenethiourea (ETU) in %	max. 0.1
stability of water suspension in %	min. 70.0
moisture in %	max. 1.5
wettability in sec.	max. 60.0

Application method:

Foliar application, spill-over, staining.

Package:

A three-ply paper bag with polyethylene and aluminium spray coating - 25 kg, paperboard container with a PE-insertion - 1 kg.

Warning:

In line with regulations in force on poisons and other harmful-for-health materials, Novozir® MN 80 is not classified to be poisonous. Follow directions for use attached to all packages.
